EXPERIENCE

Rule Developer

Transcepta LLC

04/2019 - Present

Technology company based in Aliso Viejo, CA that automates supply chain and accounts payable processes for large corporations.

Achievements/Tasks

- Set up logic for automated extraction of key info from documents.
- Carry out programming tasks using vbScript, JavaScript, Regular Expressions, and MySQL.
- Built AutoHotKey and SQL scripts to speed up our team's internal processes.
- Volunteered to conduct onboarding and training of new team members. Became sole trainer among the team, training over 10 new employees.

Open Source Contributor

freeCodeCamp

06/2022 - Present

Achievements/Tasks

- Contributing code to freeCodeCamp's open source learning platform.
- Carry out bug fixes and improvements to lesson material.

PROJECTS

Budget Snapshot Tool

- A web app that enables easy creation of a personal monthly budget.
- Allows the user to make changes and quickly visualize how their financial picture looks under different circumstances.
- Built with React and MaterialUI.

Bubble Note

- Note taking application build on the idea of categories flowing into subcategories.
- Allows the user to create Nodes, which can contain pages or more Nodes. (Can be nested to any depth.)
- Uses Tailwind for styling, React for frontend logic, and Object Oriented Programming principles to keep track of the tree structure of the user's notes.
- Work in progress. [Progress can be viewed on Github.](#)
