## EXPERIENCE

### Rule Developer Transcepta LLC

04/2019 - Present

Technology company based in Aliso Viejo, CA that automates supply chain and accounts payable processes for large corporations.

*Achievements/Tasks*

- Set up logic for automated extraction of key info from documents.
- Carry out programming tasks using vbScript, Regular Expressions, and MySQL.
- Built AutoHotKey and SQL scripts to speed up our team's internal processes.
- Conduct onboarding and training of new team members.

## PROJECTS

### Monthly Budget Maker

- A web app that enables easy creation of a personal monthly budget.
- Allows the user to make changes and quickly visualize how their financial picture looks under different circumstances.
- Built with React and MaterialUI.

### Random Quote Generator

- Uses a Web API to display random quotes.
- Handles asynchronous calls within a React component.

## CERTIFICATES

### Responsive Web Design

*freeCodeCamp*

### JavaScript Algorithms and Data Structures

*freeCodeCamp*
