MongoDB

Software Engineer specializing in JavaScript, React, and Node.
Seeking a development role and a team to grow with.

WORK EXPERIENCE

Rule Developer

(Apr 2019 - Present)

Transcepta LLC

- Teaching our system to extract key info from documents in a wide variety of formats.
- Carrying out programming tasks using vbScript, JavaScript, Regular Expressions, and MySQL.
- Created AutoHotKey and SQL scripts that sped up some of our team's internal processes by more than twofold.
- Volunteered to conduct onboarding and training of new team members. Became the sole trainer among the team, training over 10 new employees.

Open Source Contributor

(Jun 2022 - Present)

freeCodeCamp

- Contributing to freeCodeCamp's open source learning platform.
- Fixing bugs and making improvements to their lesson material.

PROJECTS

BubbleNote

- Note taking application built on the idea of categories flowing into subcategories.
- Uses Tailwind for styling, React for frontend logic, and Object Oriented Programming principles to keep track of the tree structure of the user's notes.
- Note: this is a work in progress. [Progress can be viewed on Github.](#)

Budget Snapshot Tool

- A web app that enables easy creation of a personal monthly budget.
- Allows the user to make changes and quickly visualize how their financial picture looks under different circumstances.
- Built with React and MaterialUI.

Project Euler

A series of difficult algorithm challenges. Solved first 25 problems and counting. [Progress tracked on Github.](#)
