SQL

EXPERIENCE

Rule Developer
Transcepta LLC

04/2019 - Present

Technology company based in Aliso Viejo, CA that automates supply chain and accounts payable processes for corporate clients.

Achievements/Tasks

- Set up logic for automated extraction of data from documents with varying layouts and formats.
- Did light programming work using vbScript and Regular Expressions.
- Built and maintained AutoHotKey and SQL scripts to speed up our internal processes.
- Became the designee on our team for onboarding and training of new team members.

PROJECTS

Monthly Budget Maker
- A web app that enables easy creation of a personal monthly budget.
- Allows the user to make changes and quickly visualize how their financial picture might look under different circumstances.
- Built with React and MaterialUI.

Random Quote Generator
- Uses a Web API to display random quotes.
- Handles asynchronous calls within a React component.
