`Express`

`MongoDB` `SQL`

WORK EXPERIENCE

Rule Developer
Transcepta LLC

04/2019 - Present

Technology company based in Aliso Viejo, CA that automates supply chain and accounts payable processes for large corporations.

Achievements/Tasks

- Set up logic for automated extraction of key info from documents.
- Carry out programming tasks using vbScript, Regular Expressions, and MySQL.
- Built AutoHotKey and SQL scripts to speed up our team's internal processes.
- Conduct onboarding and training of new team members.

PROJECTS

Budget Snapshot Tool
- A web app that enables easy creation of a personal monthly budget.
- Allows the user to make changes and quickly visualize how their financial picture looks under different circumstances.
- Built with React and MaterialUI.

Random Quote, JS Calculator, & Pomodoro Timer
- Projects built for freeCodeCamp's Front End Development Libraries certification.
- Making use of React and React Hooks, web APIs, and asynchronous functions.
